SUMMARY

Experienced Backend Developer specializing in C#/.NET, Azure cloud services, and Full-Stack development. 2 years building scalable enterprise applications, APIs, and microservices. Proven expertise in CI/CD pipelines, database optimization, and system architecture. Strong foundation in modern frameworks, containerization, and automation. Passionate about clean code, performance optimization, and delivering robust solutions that drive business growth.

EXPERIENCE

Backend Developer · SKN Group
Mar — May 2025

- Led complete digital transformation initiative for enterprise-level systems, managing cross-functional development teams through agile methodologies and strategic project coordination
- Architected and deployed Azure cloud infrastructure with automated DevOps pipelines, overseeing full development lifecycle from code review to production releases
- Established comprehensive development frameworks and Git workflows that increased team productivity by 40% while maintaining rigorous code quality standards
- Provided technical mentorship to development teams and implemented enterprise security protocols with comprehensive compliance frameworks

Full-Stack Developer · Mont-Royal Canada LLC
Nov 2024 — Mar 2025

- Led complete web platform development for multinational consulting company with executive leadership collaboration and end-to-end project management
- Implemented agile methodologies with sprint reviews, coordinating design, development, and deployment within timeline and budget constraints
- Developed multilingual website (az/en/ru) using ASP.NET Core 8 MVC, MS SQL Server with admin panel and role-based authentication
- Optimized performance to 120-200ms response times and SEO strategies generating 1,200+ users first week, 20,000+ monthly traffic

Backend Developer · Buta Group
Sep — Dec 2024

- Developed backend functionalities for enterprise systems using ASP.NET Core and MS SQL Server, focusing on CRM and ERP system integrations
- Automated data flow across departments to improve operational efficiency and streamline business processes
- Participated in code review processes and provided comprehensive technical documentation for system maintenance and future development

SKILLS

Programming Languages

C#, JavaScript (ES6+), HTML5, CSS3, Sass, T-SQL (MS SQL Server), MySQL

Libraries & Frameworks

ASP.NET Core , ASP.NET Core MVC, ASP.NET Core Web API, ADO.NET, Entity Framework, LINQ, SignalR, React.js, jQuery, Ajax, Swagger/OpenAPI

Tools & Platforms

Git, GitHub, Azure, Azure DevOps, CI/CD Pipelines, Postman, Netlify, Vercel,

SELECTED PROJECTS

Vanguard E-Commerce

Comprehensive fashion platform with Braintree payments, ASP.NET Core 7 MVC, responsive design, order tracking.

Pustok Online Book Marketplace

Vendor platform with ASP.NET Core 6 MVC, MSSQL, role-based access control.

Instagram Analytics Platform

Meta API integration for follower analysis with real-time dashboards.

EDUCATION

Software Development

Code Academy
2023 — Apr 2024

Graduated with Distinction (93% GPA). Intensive Full Stack program in C#, .NET Core, ASP.NET Core, MS SQL Server.

Technical Exploitation of Vehicles

Baku Technical College under AzTU
Sep 2015 — Jul 2019

Comprehensive expertise in transportation logistics, automotive systems, and industrial engineering principles.
